

Bubblers

Designed for protection

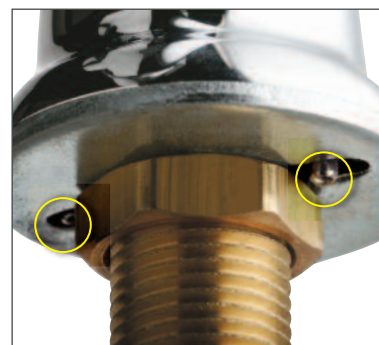

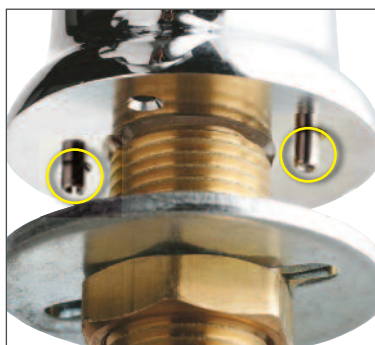

Bubblers designed with kids in mind.

Chicago Faucets' bubblers have been designed with a focus on added durability and safety. Choose from nine models with a choice of all-metal or flexible heads. Our flexible head helps protect against injury by flexing on impact. The bubbler's plastic mouth guard features antimicrobial properties that inhibit disease-causing organisms, reducing the spread of germs.

Of course, kids can be pretty tough on a bubbler, so we also incorporated vandal-resistant features specifically for classroom applications. The Chicago Faucet family of bubblers features a clean, sleek design that blends in nicely on various applications.

Designed to stand up to heavy use and resist vandalism.

Chicago Faucets' Bubblers feature anti-rotation vandal-resistant pins that fasten the bubbler securely to the mounting deck. This added feature, along with the recessed vandal-resistant volume control, withstands heavy-use while discouraging tampering.

Benefits of our bubblers:

- Vandal-resistant pins for secure deck mounting
- Vandal-resistant volume control for tamper-proof, consistent water flow
- Solid cast brass body to withstand heavy use
- Inlet shank with 1/2" NPSM coupling nut for 3/8" or 1/2" flexible riser
- .7 GPM integral flow control maximizing water conservation and user pleasure
- ADA compliant to meet federal guidelines and provide accessible operation
- Buy American Act compliant – foundry, machining and assembly in the United States

ECAST® models are designed and manufactured with total lead content equal to or less than one quarter of one percent (0.25%) by weighted average. These products are intended for installation in locations where state laws and local codes mandate lead content levels or where lead content is a concern.
