

When is polished chrome
red, white & blue?

When you buy products from Chicago Faucets.

The American Recovery and Reinvestment Act includes a Buy American provision designed to protect the American worker by saving and creating jobs. Ironically, it also allows foreign companies with off-shore manufacturing to claim Buy American compliance as long as certain trade agreement requirements are met.

At Chicago Faucets, our foundry, plating, machining and assembly facilities are right here in the United States. We've never needed a congressional act to claim that our products are red, white and blue. Quite simply, it's the result of where they are made.

We believe our products match the true intention of this important initiative to protect the American worker and keep American money in America. So if you're ready to buy American, don't settle for just an act – get the real thing. Contact your local Chicago Faucets representative or call 800/323-5060 for more information.

Buy American Act Compliant

Support Documentation

The United States Government offers guidelines on Substantial Transformation that help to determine whether a manufactured good to be incorporated into a project being built with ARRA funds was manufactured in America.

Chicago Faucets provides this documentation for every product that features our Buy American Act Compliant logo. These documents can be downloaded from our website at chicagofaucets.com.

Website Support

On our website, we make it easy for you to know if the product you're specifying or installing meets the Buy American Act.

Products are compliant if you see our Buy American Act logo and you can use the links to download our BAA documents. While you're on our website, be sure to check-out product configurator to help find just the right product for your installation.

Manufacturing & Assembly

- Chicago Faucets has been America's leading manufacturer of commercial faucets for over 100 years
- Research and development are conducted at our corporate headquarters in Des Plaines, IL
- Our facility located in Milwaukee, Wisconsin provides most of our foundry, manufacturing and finishing processes
- Many of our components and small parts assemblies come from our facility in Elyria, Ohio
- At our Michigan City, Indiana facility our products go through final assembly and shipping
