

Undermount Faucets With One-Piece Body

Performance starts with the body.

Introducing the new Chicago Faucets undermount faucet with a one-piece body. Chicago Faucets undermount faucets are better than ever before and more installer friendly than just about any other commercial faucet on the market. One-piece bodies, pre-assembled parts, and individual testing help deliver durable performance and an easier installation. Plus, with a lifetime warranty on the body and interchangeable handles, spouts, outlets, and cartridges – you get a faucet that not only lasts, but one that's easy to upgrade.

- Solid, one-piece cast brass body designed, manufactured, and assembled in the USA
- One-piece design delivers precise alignment and extra strength
- Fewer parts and pre-assembled components for a faster, one-person installation that reduces labor costs for installation and ongoing maintenance
- Fully threaded valve body adjusts to almost any deck thickness
- Interchangeable with the same handles, spouts, cartridges, and outlets you use on your current Chicago Faucets to provide unsurpassed flexibility

Undermount Faucets with One-Piece Body

Save time and labor cost with fewer parts and pre-assembled components for a one-person installation in just a matter of minutes.

Unsurpassed interchangeability and compatibility with the Chicago Faucets handles, spouts, outlets, and cartridges you already use.

Keep the water in the sink and off the deck with a retrofittable restricted swing spout option.

The widest range of applications with a fully-threaded valve body that adjusts to almost any deck thickness.

Meet the latest codes & standards with ECAST® faucets for lead-reduction laws and models for CALGreen requirements.

Built to last with a solid, one-piece, cast brass body designed, manufactured, and assembled in the USA for maximum strength and stability.

Optional restricted swing spout provides extra protection and flexibility.

Our new restricted swing spout provides the convenience of a standard swing spout while keeping the water in the sink. A choice of two restricted swing options can be selected during installation. The unique design of our spout provides extra flexibility and convenience at the job site.

70° Restricted Swing

120° Restricted Swing

Codes & Standards

ASME A112.18.1M

CSA B125 Certified

Certified to NSF/ANSI 61, Section 9 by CSA
